

Johnson Quarries, Inc. is a family owned and operated bluestone mining business. Owner, Jerry Johnson Sr., has worked in bluestone mining since he was a child and began his own business in 1980. Johnson Quarries Inc. currently operates several quarries in the heart of the beautiful Endless Mountains of Northeast Pennsylvania.

We mine all of our own stone from our own quarries and produce the very finest quality of Pennsylvania Bluestone available. Over the years, our business has expanded from natural wall stone and hand-split stone to include thermal bluestone, aggregate, decorative stone, and much more. We strive to be the best and are continually updating to meet our customers' needs all over the United States.

Please visit our website for a preview
of our business and products.
